Payroll Tax (United States)

This document describes changes to payroll taxes in the United States. Please read this document carefully before you use the software.

Downloading and installing updated taxes

You can download the tax update from within Payroll or from the Sage Customer Portal.

CAUTION: Do not install the tax update until all payroll checks for 2015 have been processed.

Download and install from within Payroll

To use Download Taxes on a network, you must first log onto your network as the system administrator.

- 1 If you use security, log onto your system as a user with permissions to the Download Taxes task (PR: Tools > Download Taxes).
- 2 Start the Payroll application.
- 3 Select **Tools > Download Taxes** to download the latest version of the tax files.

NOTE: If you are using a firewall, you must allow access to <http://downloads.timberline.com/route.asp> to enable Payroll to download the tax update.

- 4 Verify your Client Number.
- 5 Select the **Update tax file when download is complete** check box if you want to update the taxes automatically after the files are downloaded. If you do not select this check box, you must update the taxes, as described on [page 2](#).
- 6 View the printed journal for any error messages.
- 7 If you have multiple tax files, open the data folder and repeat these steps for each company.

Download from the Sage Customer Portal

Updating taxes

If you chose not to install taxes when you downloaded the tax update, you will need to perform additional steps.

New installations

If you did not select the **Update tax file when download is complete** check box when you downloaded the taxes, the system displays following error message when you select **Tools > Update Taxes**:

“The PR Tax file was not found. The file will be created.”

Click [OK] to continue.

Tax updates

If you downloaded the taxes but you did not select the **Update tax file when download is complete** check box, replace the old taxes with any new ones:

- 1 Start the Payroll application.
- 2 Select **Tools > Update Taxes** to replace tax records in the **Tax.prx** file with tax records from the **New.prx** file (if the tax record in the **New.prx** file has a later effective date).
- 3 If you have multiple tax files, open the data folder and repeat step 2 for each company. See the "To Update Payroll tax rates" topic in Payroll Help for details.
