Payroll Tax Updates

The following federal, state, and local tax changes are included in this update.

Federal Legislative Updates

There are no federal legislative updates with this release. However, we just received information from the U.S. federal government about updates to the 2018 tax tables as a result of the recent tax reform. We are implementing the updates for the new year, and we will release another update (SR2) in early February. We will notify you when this update is available.

You should install the SR1 update if you have employees in one of the states with tax changes included in this update. If you do not have employees in one of these states, we recommend waiting for the SR2 product update.

State and Local Legislative Updates

This section lists state and local legislative updates available with this release. If a state or locality is not listed in this section, there are currently no tax updates or product modifications for that state or locality.

Note: Sage 300 U.S. Payroll includes some system-supported State Disability Insurance (SDI) codes, which are updated automatically (for example, with rate changes) when you install product updates. To use these codes, your SDI codes must match the system-supported codes.

If you use custom tax codes to capture SDI taxes, note the following:

- If your codes match the system-supported tax codes, you should review the tax code setup before processing payroll.
- If your codes do not match the system-supported tax codes, you can switch to using the system-supported codes. To do this, you must deactivate your custom tax codes, and then set up the system-supported tax codes.
- Regardless of whether or not your codes match the system-supported tax codes, you must follow your existing procedures for reporting and filing SDI taxes as custom taxes.

Information about changes to specific system-supported SDI codes is included in the sections for the related states.

Product Updates

The following product updates are included with this release.

Payroll Product Updates

We have fixed a problem that could cause earnings, deductions, or taxes to be calculated incorrectly for employees who are paid hourly overtime. This problem occurred because the calculations excluded overtime hours.

If you calculated payroll after installing the 2017 Q4 product update, review payroll amounts for employees who were paid hourly overtime and ensure that all amounts are correct. If you find incorrect amounts and need help correcting them, contact Sage support or your Sage business partner.
