Enhancements and Corrections

The following is a list of enhancements and corrections that have been incorporated into this Sage 500 ERP 2019 Product Update.

*Indicates a new enhancement or program fix in this Update. All new to Product Update 5 have been consolidated under one section "Product Update 5".

Enhancements

Enhancement: This issue changes the "Material Requirements Planning Generation" form's "Options" tab "Selection Options" frame by replacing one existing checkbox with two checkboxes. Refer to Issue ID 50404 below.
Available: Product Update 1
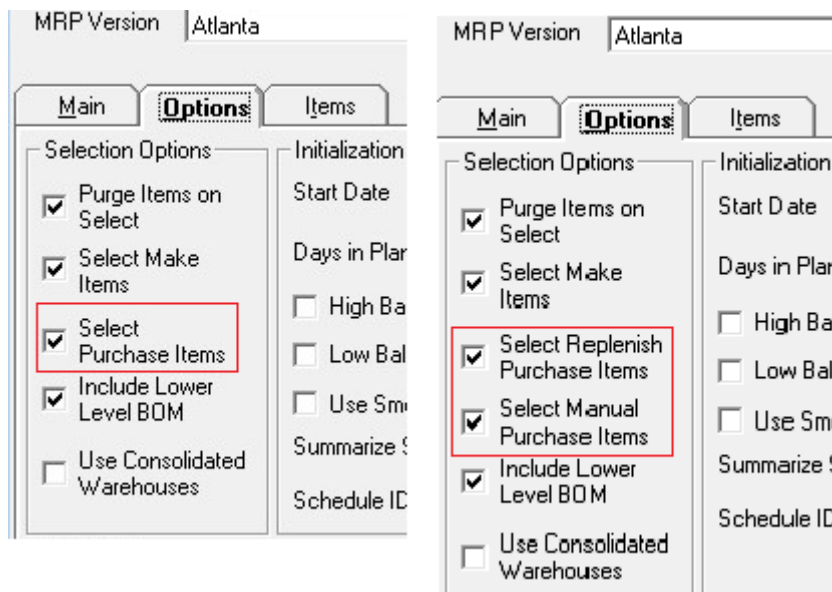

MRP uses the inventory management module's replenishment system. The IM replenishment system does not process inventory items that have a reorder method of "Manual". MRP picks up such items in its processing. This led to a situation where MRP selection would pick up items for which it cannot generate actual orders. Depending upon your point of view, this could be considered good or bad. For those who do not wish to include items that cannot yield an actual order, this change allows a user to skip inventory items that are configured for manual replenishment, while still allowing the previous behavior.

By checking both checkboxes on the new version, you will get the same behavior as the previous version. Both checkboxes are checked by default. Should you choose to keep both checkboxes checked and the system detects that manual items are included in a planned order run, the system will now display a new warning message on the Messages tab of the MRP Requirements Planning Inquiry indicating the item must be manually replenished.

The approach taken for this issue was to allow those who like the previous behavior to keep it, while allowing those who prefer to only process replenishment items that can generate an actual purchase order to skip manually replenished items.

Enhancement: Visual Process Flow changed to not use Flash

Visual Process Flows have been updated to remove the use of Flash. A result of the change may be that your internally defined Process Flows may be misaligned or text may not be visible depending on how they were defined and how they will display in the new HTML5 layouts. You may need to edit them to get them looking the way you want.
Refer to Issue ID 50571 below.
Available: Product Update 5

*Product Update 5

Issue ID	Module	Short Description	Objects Modified - Client	Object Modified - Database
50539	AR	Other Memos do not auto display when first Memo set up is not set to Auto Display	arzda001.frm, ARZDADL1.dll arzdd002.frm, arzdddl1.dll arzma001.frm, arzma001.exe sozde001.frm, sozde001.exe sozdf001.frm, sozdf001.exe sozdj101.frm, sozdj101.exe Sozdk003.frm, Sozdk003.exe sozdr001.frm, sozdr001.exe, sozdrdl1.dll	
50568	AR	Sales Tax Exempt number missing from Sales Tax Report for recurring invoices		spARCreateInvcFromRecur.sql

50397	MF	Work Order Maintenance not displaying Qty Total or Tot Quantity when quantity equal or greater than 10,000,000	mfzdb001.frm, mfzdb002.frm, mfzdb001.exe	
50419	MF	Efficiency % resets back to 100% for a Progress Step in Maintain Routing	mfzda001.frm, mfzda001.exe	
50414	SO	In Enter Sales Orders and Quotes, the map button for MapQuest is no longer working	MapButton.ctl, buttoncontrols.ocx	50414_New Local Strings.sql

Installation Instructions

Installing the Server

**Note: All users must log out of the Sage 500 ERP applications prior to installing the server update.**

1. To begin the Sage 500 ERP 2019 Server installation, double-click **2019PU5S.exe** and click **Next** to proceed.
2. Indicate the location to which the installation files should be saved. Select the default location, or select **Change** to browse to a different location.

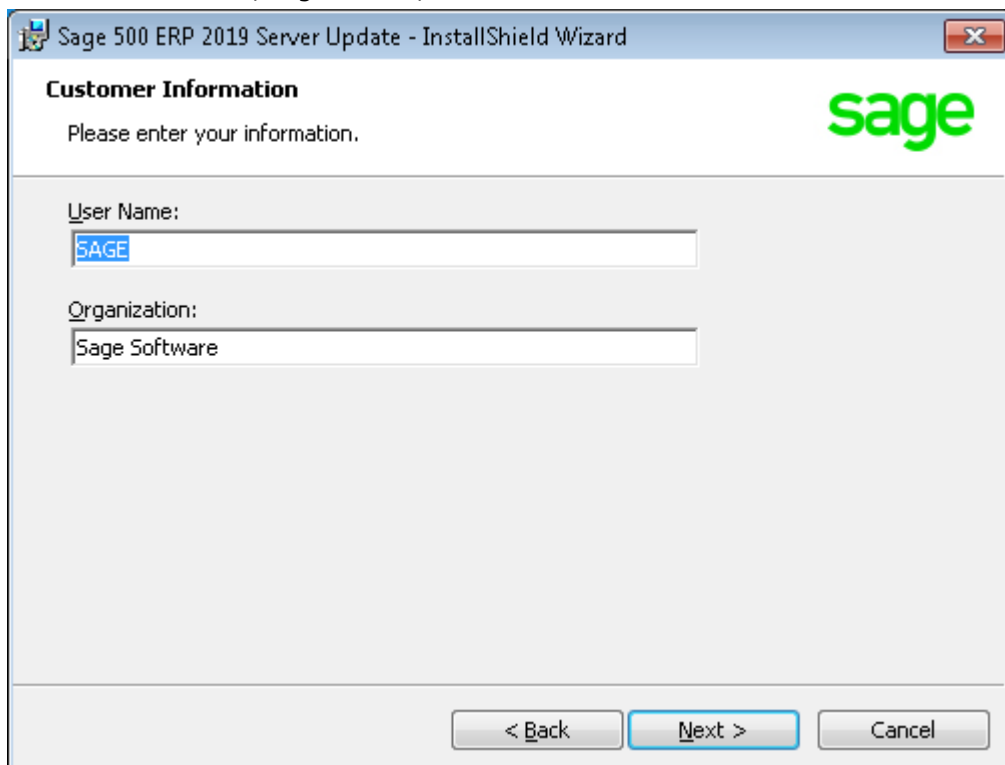

3. At the welcome screen, select **Next** to continue, or **Cancel** to exit setup.
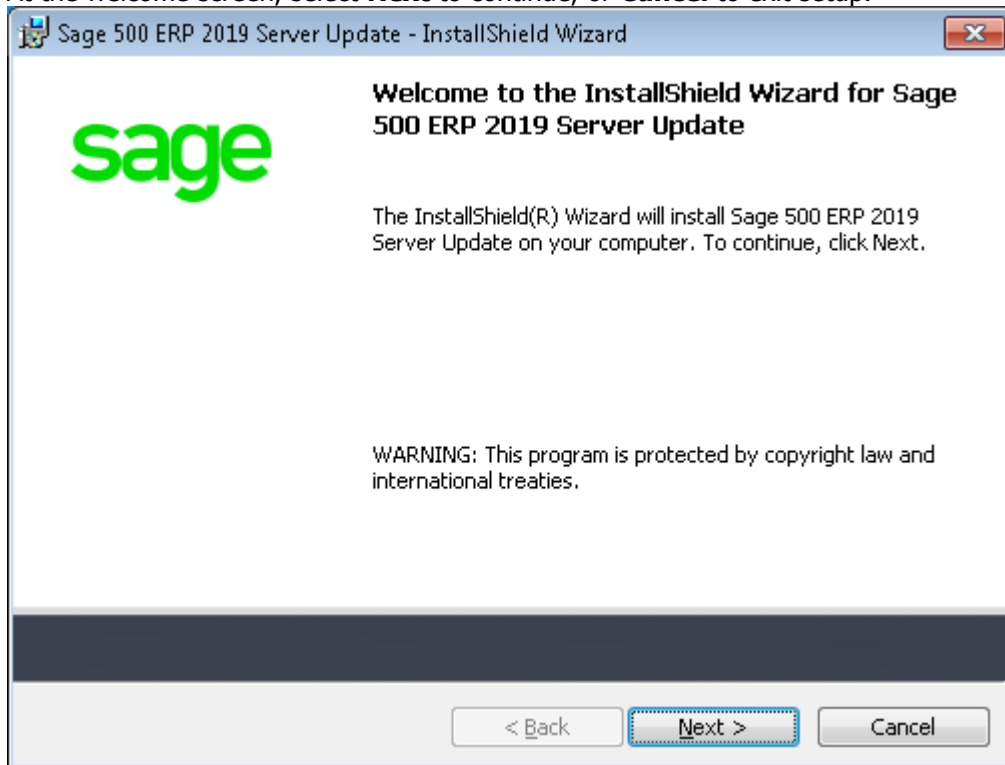

4. Read the License Agreement, select the Accept option and click **Next** to continue.

5. Enter the User Name, Organization, and click **Next** to continue.
6. Select **Complete** and click **Next** to continue.
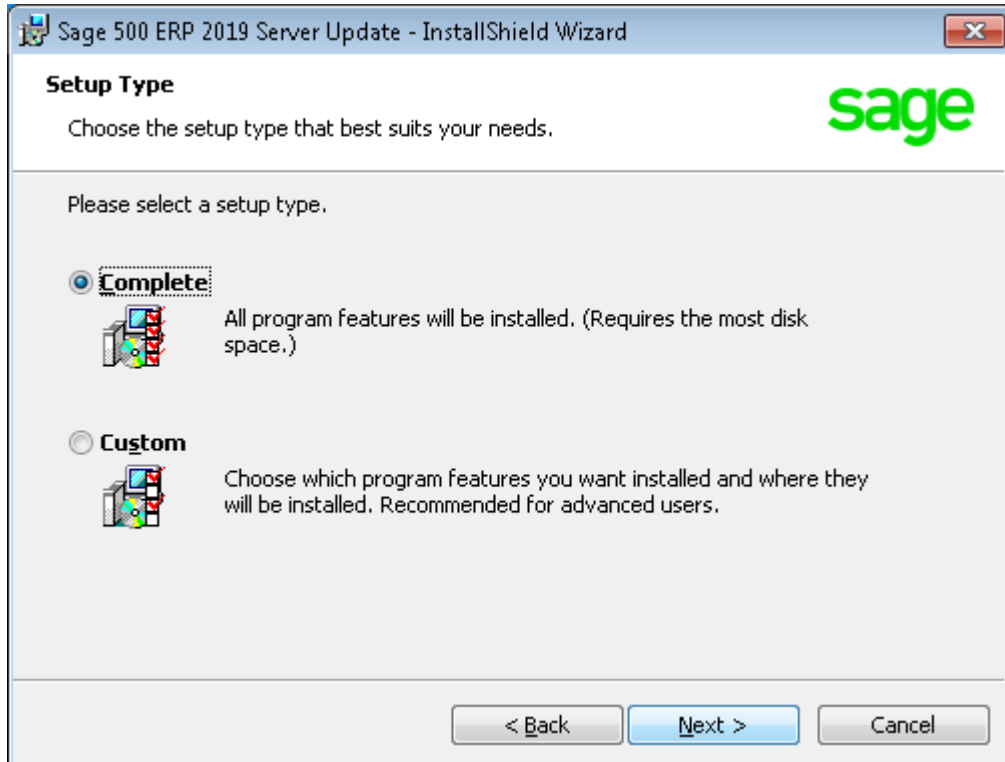

7. Click **Install** to continue.
8. At the completion screen, click **Finish** to complete the Sage 500 ERP Server installation.

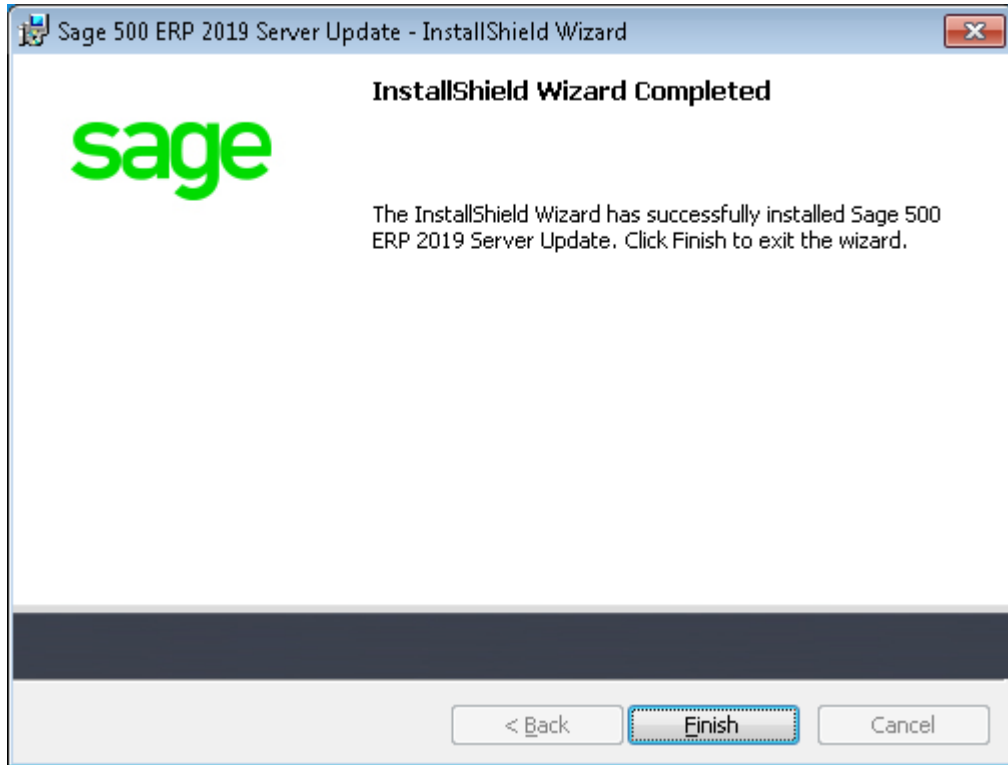

9. If you receive a message to restart the system, click **Yes** to continue. After the system has been restarted, select **Sage 500 ERP 2019 Product Update 5** from the Sage 500 ERP 2019 program group.
10. Enter the SQL Server Name and SQL Server sa password, select **Proceed** to continue.

---

11. Enter the name of the Sage 500 ERP Application Database and select **Proceed** to continue.

12. This confirmation dialog will display; select **OK** to continue.

13. After applying the update to the Sage 500 ERP Database, you may view the updates by clicking **Yes** at the following dialog box:
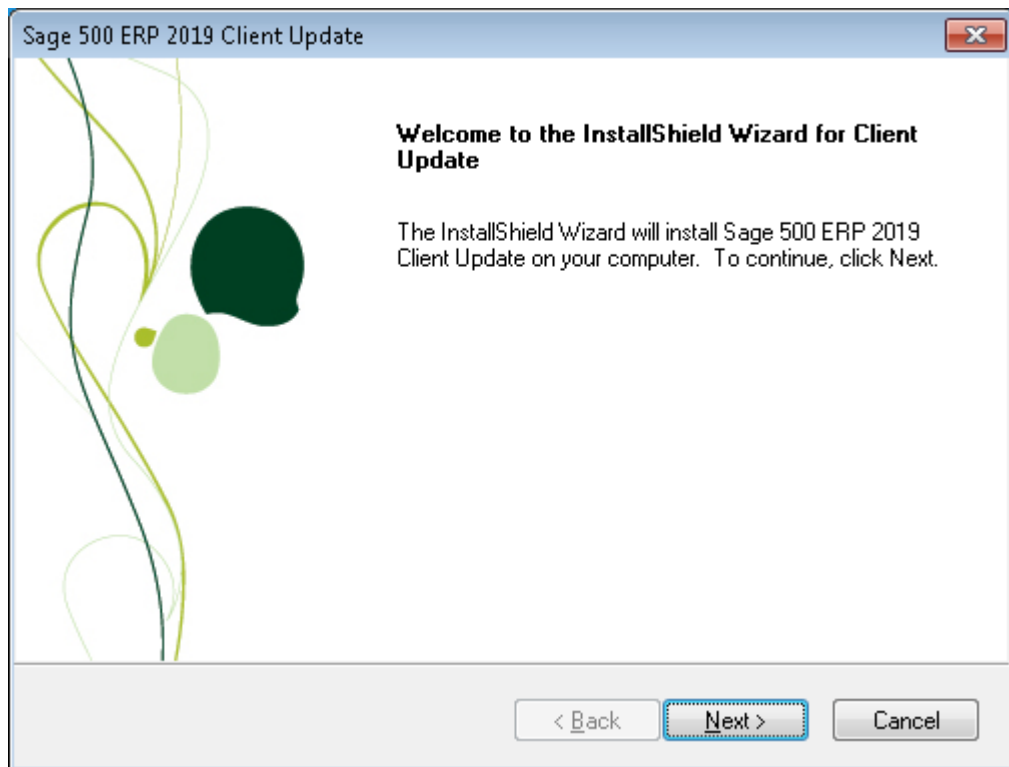

Installing the Client

1. To begin the Sage 500 ERP 2019 Client installation, double-click the **2019PU5C.exe**. A screen similar to the one below will display, click **Continue** to proceed.
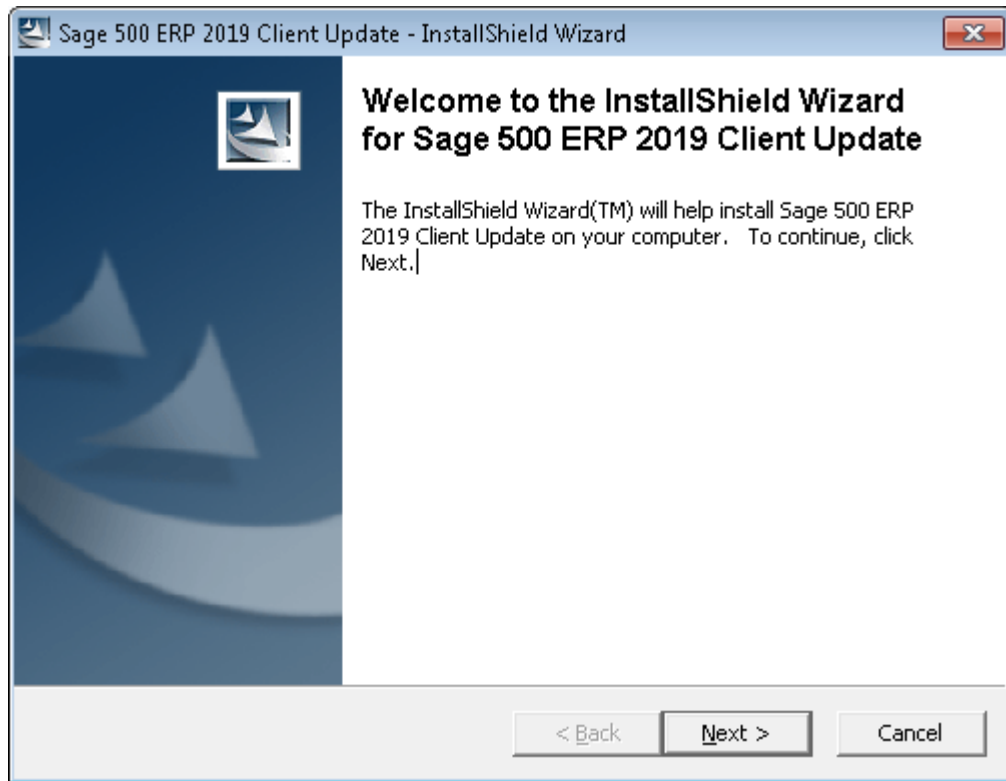

2. At the Welcome screen, click **Next** to continue.

3. At the completion screen, click **Finish** to complete the Sage 500 ERP Client update installation.
