Any prior customizations may be altered or overwritten upon installation of this product update. The user assumes all responsibility for corruption or loss of data.

Enhancements and Corrections

The following is a list of enhancements and corrections that have been incorporated into this Sage 500 ERP 2021 Product Update.

*Indicates a new enhancement or program fix in this Update. All new to Product Update 2 have been consolidated under one section "Product Update 2".

Enhancements

Enhancement: Visual Process Flow changed to not use Flash

Visual Process Flows have been updated to remove the use of Flash. A result of the change may be that your internally defined Process Flows may be misaligned or text may not be visible depending on how they were defined and how they will display in the new HTML5 layouts. You may need to edit them to get them looking the way you want.
Refer to Issue ID 50571 below.
Available: Product Update 1

Installation Instructions

Installing the Server

Note: All users must log out of the Sage 500 ERP applications prior to installing the server update.
1. To begin the Sage 500 ERP 2021 Server installation, double-click **2021PU2S.exe** and click **Next** to proceed.
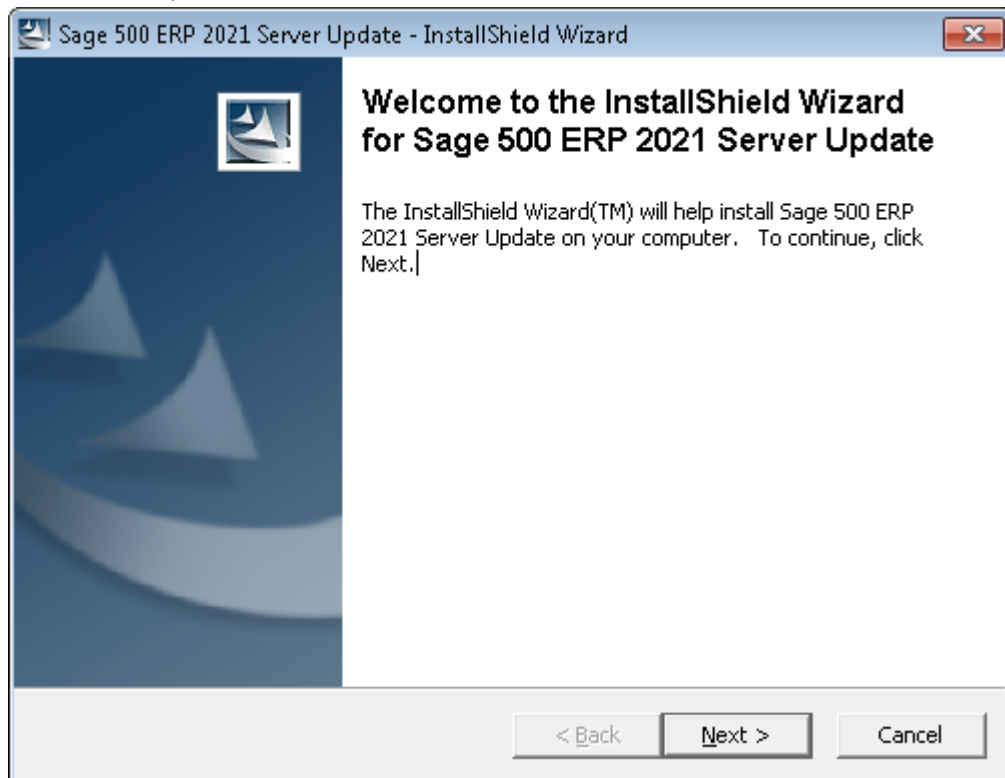

2. Indicate the location to which the installation files should be saved. Select the default location, or select **Change** to browse to a different location.
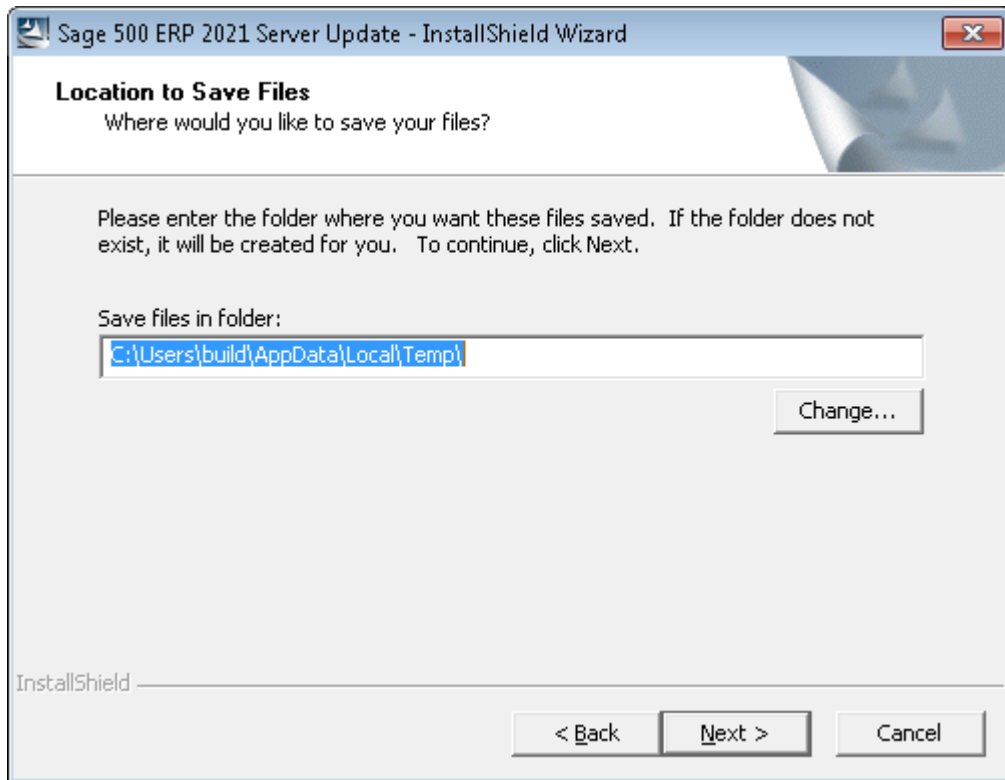

3. At the welcome screen, select **Next** to continue, or **Cancel** to exit setup.

4. Read the License Agreement, select the Accept option and click **Next** to continue.

5. Enter the User Name, Organization, and click **Next** to continue.
6. Select **Complete** and click **Next** to continue.

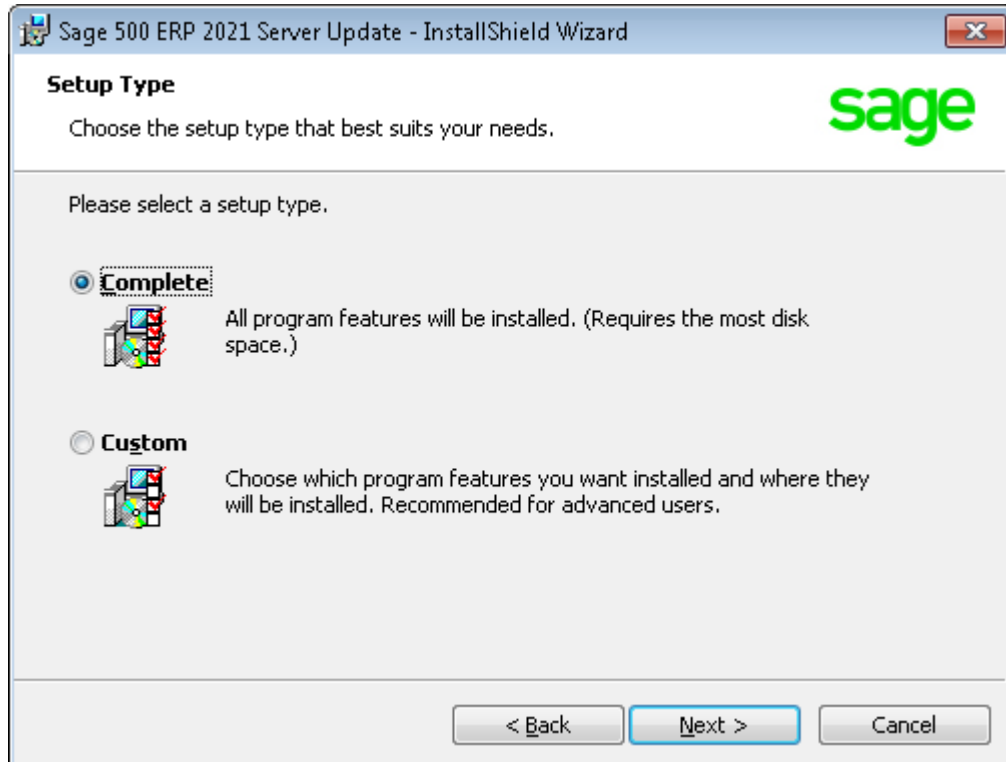

7. Click **Install** to continue.
8. At the completion screen, click **Finish** to complete the Sage 500 ERP Server installation.

9. If you receive a message to restart the system, click **Yes** to continue. After the system has been restarted, select **Sage 500 ERP 2021 Product Update 2** from the Sage 500 ERP 2021 program group.

10. Enter the SQL Server Name and SQL Server sa password, select **Proceed** to continue.
11. Enter the name of the Sage 500 ERP Application Database and select **Proceed** to continue.

12. This confirmation dialog will display; select **OK** to continue.
13. After applying the update to the Sage 500 ERP Database, you may view the updates by clicking **Yes** at the following dialog box:
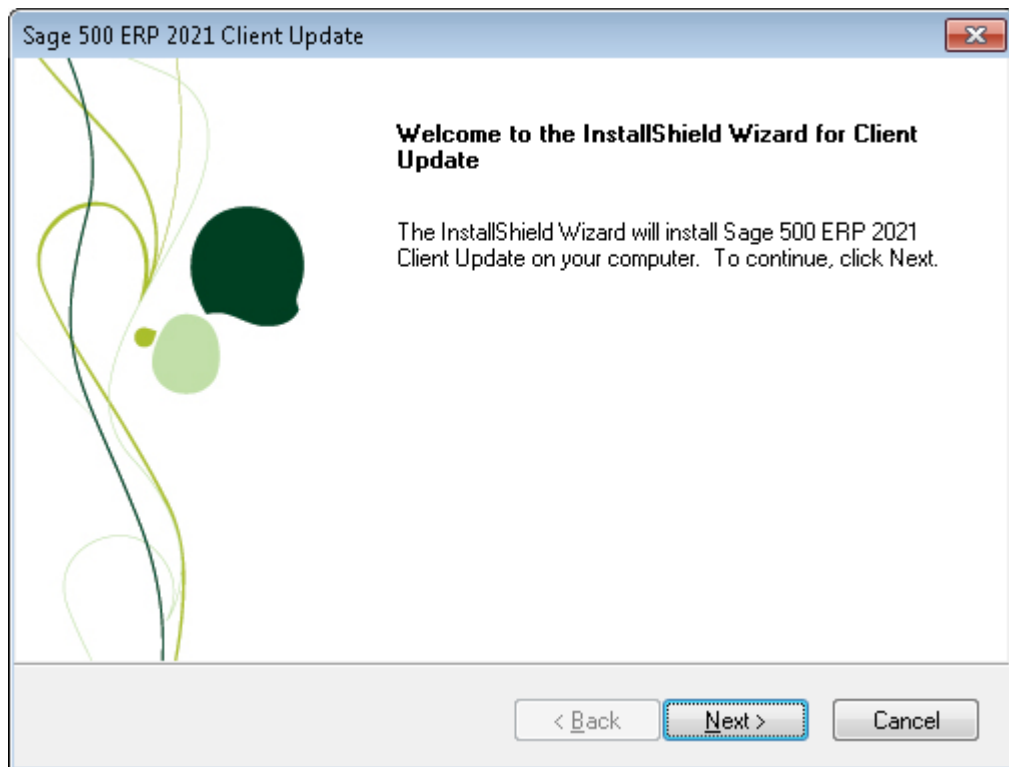

Installing the Client

1. To begin the Sage 500 ERP 2021 Client installation, double-click the **2021PU2C.exe**. A screen similar to the one below will display, click **Continue** to proceed.
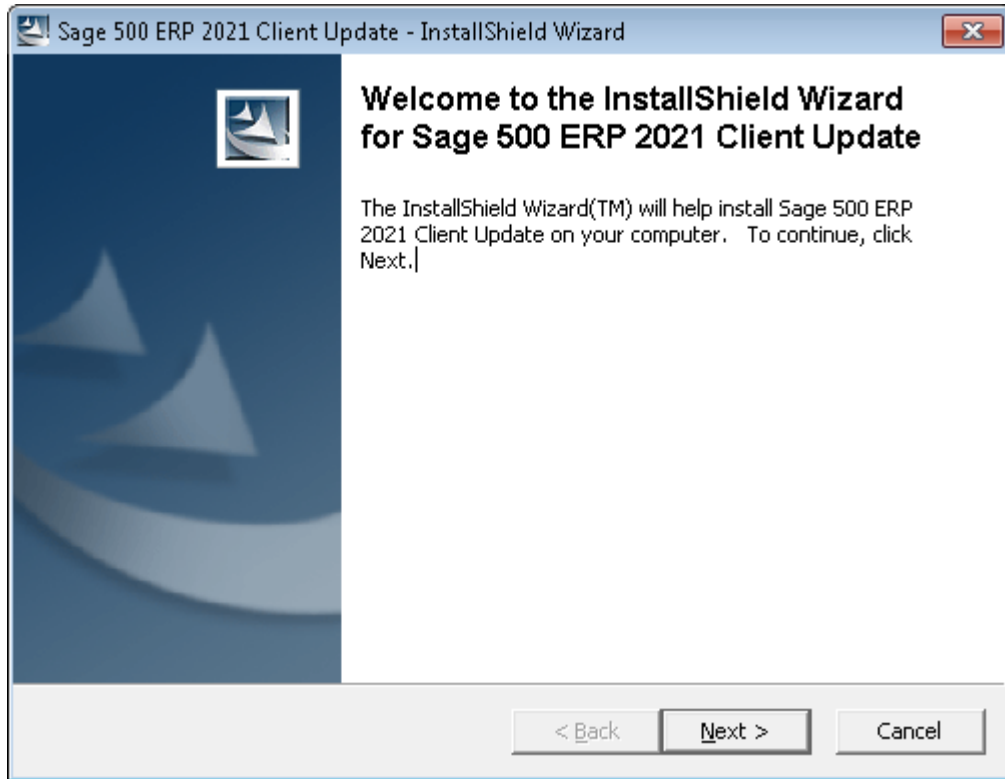

2. At the Welcome screen, click **Next** to continue.

3. At the completion screen, click **Finish** to complete the Sage 500 ERP Client update installation.
